## PROFILE

MERN Stack Developer with more than 4 years of experience in building scalable web applications using MongoDB, Express.js, React, and Node.js. Collaborated with agile teams to deliver high-quality solutions and optimize application performance. Focused on writing clean, efficient code, solving complex problems, and staying current with emerging technologies.

## WORK EXPERIENCE

### FRONT END DEVELOPER

#### Retail Insights *June 2024 - Present*

- Built scalable web applications with Next.js, ensuring high performance and seamless user experiences.
- Integrated Amplience CMS to deliver dynamic, content-driven solutions tailored to business needs.
- Collaborated with teams to streamline workflows and deliver quality web solutions in agile environments.

### FULL STACK DEVELOPER

#### Time Space Ventures *January 2022 - May 2024*

- Designed and built full-stack applications with secure authentication, API integration, and efficient database management.
- Delivered high-performance solutions with the MERN stack, ensuring robust and seamless user experiences.
- Improved security and decentralization through expertise in MetaMask and NFT integration.

### FULL STACK DEVELOPER

#### Applore Technologies *January 2021 - Dec 2021*

- Created multiple full-stack web applications with the MERN stack.
- Collaborated effectively with cross-functional teams for feature development.
